

Integral Sealer

Our integral sealer reduces the permeability of concrete, increasing the resistance to moisture penetration, freeze/thaw cycles and deicing salts.

- ✓ *Improved durability, extending service life of concrete*
- ✓ *Integral, so the protection is throughout entire pour*
- ✓ *Perfect for decorative concrete, increasing vibrancy of color*
- ✓ *Eliminate the time you are spending returning to job to clean and seal slab*
- ✓ *Added into your load at the batch plant with verified batch dosage*
- ✓ *Depending on conditions, a topical sealer may be required in 2-3 years*
- ✓ *Value-added performance and immediate protection for your Customer*
- ✓ *We recommend a 4,500 psi mix with a maximum water-cement ratio of 0.45 and proper curing methods per ACI 318 for our region*
